

## Java

```
class Solution {  
    public int minStoneSum(int[] piles, int k) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {number[]} piles  
 * @param {number} k  
 * @return {number}  
 */  
var minStoneSum = function(piles, k) {  
  
};
```

---

## C++

```
class Solution {  
public:  
    int minStoneSum(vector<int>& piles, int k) {  
  
    }  
};
```
